Manufacturers & Distributors of  
a Quality and Comprehensive  
Range of Bathroom Products.

### Care For Your Product – Cleaning Instructions.

#### Shower Trays

Water feeds where possible should not be connected to a water softener system as salts used with some types of units may discolour the surface.

It is normal for small amounts of localized water to be retained in the shower tray after use which should be wiped dry immediately to prevent build up of mineral sediments.

The shower tray should be cleaned with warm, soapy water only. Do not use scourers, abrasives or chemical cleaners

#### Screens & Enclosures

The enclosure must only be cleaned with warm soapy water and a damp cloth or sponge.

Abrasive, caustic or scouring products must not be used as these will damage the surfaces of the enclosure
